Profile Summary

Dedicated to creating a positive social impact, I am a committed and versatile IT professional with a passion for technology and its applications. My flexible approach, combined with a high level of motivation and enthusiasm, drives me to excel in various technical endeavors. I bring to the table strong analytical skills that enable me to efficiently tackle complex technical challenges. My track record underscores my keen attention to detail and showcases my ability to effectively collaborate within team environments. I am now actively seeking a challenging role within the IT industry, where I can harness my skills, acquire hands-on experience, and make meaningful contributions to the success of a dynamic organization.

Experience

FiatMatch (Internship)   *May 2023 – August 2023*

Software Developer

- Engaged in a agile internship as part of the final year capstone project, "FiatMatch," at Humber College.
- Collaborated with a team to develop a B2B dashboard using **React.js**, **Next.js**, **TypeScript**, **Redux**, and **Tailwind CSS**.
- Led the development and successful implementation of 10+ key features and functionalities, encompassing front-end enhancements and API integrations, driving improved user experiences and system performance.
- Leveraged technical expertise to contribute to front-end development, ensuring a seamless user experience.
- Participated in regular meetings and brainstorming sessions to optimize project workflow and enhance team collaboration.
- Gained hands on experience with modern full stack web development technologies and industry-standard tools.

Infinity Brains   *March 2021 – October 2021*

Laravel Developer

- Mastered Laravel to build robust **PHP** web-based applications and **JavaScript** to create dynamic user interfaces.
- Proficient in **Postman** for API testing to ensure functionality and reliability.
- Familiar with **Jira's** features, including task and bug management, and project coordination within the tool.
- Strong experience in **SQL**, including writing complex queries, optimizing database performance, and designing and implementing efficient database storage solutions.
- Utilized **GitHub** for version control and collaboration, including creating pull requests, merging code changes, and resolving conflicts.
- Demonstrated ability to work on multiple projects simultaneously while maintaining a impactful quality and got Full software development life cycle experience.
- Conducted thorough security testing, identifying, and resolving 25+ vulnerabilities; ensured data integrity and user privacy, fortifying the system against potential breaches, and maintaining compliance with industry standards.
- Excelled in problem-solving and communication skills, consistently delivering innovative solutions on time and gave coaching to junior developers.

Narola InfoTech   *January 2019 – July 2019*

Trainee Software Engineer

- Learned new programming languages such as **PHP**, **JavaScript**, **jQuery**, **Ajax**, as well as frameworks like **Laravel** and **WordPress**.
- Acquired proficiency in these languages and frameworks as needed for software development projects.
- Worked closely with senior developers to understand software project requirements and collaborated on the design and development of software solutions.

- Acquired knowledge and skills in database design and normalization techniques, including the ability to design and maintain complex database schemas.

Education

Humber College, Toronto
January 2022 – August 2023
Post Graduate Diploma – Information Technology Solutions
- Completed comprehensive software development program at Humber College, North Campus.
- Acquired in-depth knowledge of software development, database concepts, and web development.
- Explored advanced IT topics including database development, data analytics, and mobile application development.
- Developed expertise in software development methodologies, web, and mobile application development as well as MEAN and MERN stack.
- Collaborated on projects, enhancing teamwork, problem-solving, and project management skills.

Sarvajanik College of Engineering and Technology – India
August 2015 – May 2019
Bachelor of Engineering in Information Technology
- Gained in-depth knowledge of Information and Technology concepts through coursework.
- Developed proficiency in database management, object-oriented concepts, Data Communication and Networking, and Information Security.
- Developed a strong understanding of database management principles and practices.
- Acquired expertise in object-oriented programming concepts and their application in software development.

Projects

Employment Engagement website - https://employer-engagement-event.vercel.app
- Developed a dynamic website for the employer engagement event at Humber college, using HTML and CSS.
- Collaborated with a team to ensure functionality, intuitive design, and compatibility across devices and browsers.
- Incorporated event details, schedules, participating companies, and registration information.
- Successfully launched the website, serving as a centralized platform for employers and students.
- Received positive feedback from stakeholders for the Employment Engagement Website, resulting in a 15% increase in employer participation compared to the previous year.

RedPrix
- Developed and tested scalable, high-performance RESTful APIs for RedPrix with CI/CD using Laravel framework.
- Optimized API performance, resulting in a 30% decrease in response time, enhancing the overall user experience for RedPrix.
- Implemented security gateways and protocols (JWT, OAuth2.0, OIDC) to ensure secure authentication and authorization.
- Integrated SSL certificates for encrypted connections and data protection.
- Managed MySQL database operations with a focus on data integrity and security.
- Employed Postman for API functionality verification and troubleshooting.
- Collaborated with front-end developers to integrate UI and UX design for back-end web development.
- Streamlined database operations, reducing query execution time by 25% and enhancing system efficiency for RedPrix.

Technical Skills

- **Core Technology**: Node.JS, Express JS, ReactJS, NextJS, Typescript, Bootstrap, jQuery, Ajax, Laravel, JavaScript, Java, PHP, HTML5, CSS, Angular
- **Database**: SQL, MongoDB
- **Tools**: Eclipse, Vscode, Git, GitHub, Postman, Android Studio
