## Experience

**FiatMatch (Internship)** *May 2023 – August 2023*
Full Stack Developer

- Engaged in an agile internship as part of the final year capstone project, "FiatMatch," at Humber College.
- Collaborated with a team to develop a B2B dashboard using **React.js**, **Next.js**, **TypeScript**, **Redux**, and **Tailwind CSS**.
- Led the development and successful implementation of 10+ key features and functionalities, encompassing front-end enhancements and API integrations, driving improved user experiences and system performance.
- Leveraged technical expertise to contribute to front-end development, ensuring a seamless user experience.
- Participated in regular meetings and brainstorming sessions to optimize project workflow and enhance team collaboration.
- Gained hands on experience with modern full stack web development technologies and industry-standard tools.

**Infinity Brains** *March 2021 – October 2021*
Laravel Developer

- Mastered **Laravel**, building robust **PHP** web-based applications, and utilized **JavaScript** to create dynamic user interfaces.
- Proficiently handled API testing using **Postman** to ensure functionality and reliability.
- Managed tasks and bug resolution efficiently within **Jira**, facilitating project coordination.
- Demonstrated expertise in **SQL**, encompassing complex query writing, database performance optimization, and efficient storage solutions design.
- Collaborated effectively on **GitHub**, initiating pull requests, merging code changes, and resolving conflicts.
- Successfully handled three projects concurrently, overseeing the entire software development life cycle and ensuring the delivery of high-quality results.
- Conducted comprehensive security testing, identifying and rectifying 25+ vulnerabilities, enhancing data integrity, and ensuring user privacy and industry compliance.
- Showcased exceptional problem-solving and communication skills, consistently delivering innovative solutions on time, while also providing coaching to junior developers to foster their growth.

**Narola InfoTech** *January 2019 – July 2019*
Software Developer

- Acquired proficiency in programming languages such as **PHP, JavaScript, jQuery, Ajax**, as well as frameworks like **Laravel** and **WordPress**, tailored to software development projects.
- Successfully managed 2+ live projects, resolving errors and ensuring successful project delivery.
- Integrated **Amazon API** to retrieve and utilize data from Amazon, enhancing project functionality.
- Gained knowledge and skills in database design and normalization techniques, including complex database schema design and maintenance.
- Collaborated closely with senior developers to understand project requirements, contributing to software solution design and development.

## Education

**Humber College, Toronto** *January 2022 – August 2023*
Post Graduate Diploma – Information Technology Solutions

- Completed comprehensive software development program at Humber College, North Campus.
- Acquired in-depth knowledge of software development, database concepts, and web development.
- Explored advanced IT topics including database development, data analytics, and mobile application development.
- Developed expertise in software development methodologies, web, and mobile application development as well as **MEAN** and **MERN** stack.
- Collaborated on projects, enhancing teamwork, problem-solving, and project management skills.

**Sarvajanik College of Engineering and Technology – India** *August 2015 – May 2019*
Bachelor of Engineering in Information Technology

- Gained in-depth knowledge of Information and Technology concepts through coursework.
- Developed proficiency in database management, object-oriented concepts, Data Communication and Networking, and Information Security.
- Developed a strong understanding of database management principles and practices.
- Acquired expertise in object-oriented programming concepts and their application in software development.

## Projects

**TaskMaster**

- Developed "TaskMaster," a web application using ReactJS for efficient task management.
- Implemented secure user authentication and authorization through JWT tokens and Passport.js.
- Utilized Node.js and Express.js for the backend, with MongoDB as the database.
- Enabled users to perform task operations such as adding, updating, deleting, and viewing tasks.
- Visualized task data using charts and calendars, enhancing task comprehension.
- Integrated a Contact Us module for user feedback, fostering engagement and product refinement.
- Established API connections between the React project and backend using Axios.
- Gained expertise in ReactJS development, token-based security, data visualization, and user engagement strategies through this project.

**RedPrix**

- Developed and tested scalable, high-performance RESTful APIs for RedPrix with CI/CD using Laravel framework.
- Optimized API performance, resulting in a 30% decrease in response time, enhancing the overall user experience for RedPrix.
- Implemented security gateways and protocols (JWT, OAuth2.0, OIDC) to ensure secure authentication and authorization.
- Integrated SSL certificates for encrypted connections and data protection.
- Managed MySQL database operations with a focus on data integrity and security.
- Employed Postman for API functionality verification and troubleshooting.
- Collaborated with front-end developers to integrate UI and UX design for back-end web development.
- Streamlined database operations, reducing query execution time by 25% and enhancing system efficiency for RedPrix.

## Technical Skills

- **Front End**: React JS, Angular JS, Next JS, TypeScript, Bootstrap, jQuery
- **Back End**: Node JS, Express JS, Laravel, Java, PHP
- **Web Technologies**: HTML5, CSS, Tailwind CSS
- **Databases**: SQL, MongoDB
- **Tools**: VSCode, Git, GitHub, Postman, Android Studio
