

Hiral Soni

Software Developer

+1(647)866-7197 | ihiralsoni@gmail.com | Toronto, ON

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

Full-stack developer with 3 years of experience using **Node.js, TypeScript, React, and MongoDB** to build and optimize scalable web applications and RESTful APIs. Passionate about solving complex problems and excited to contribute technical expertise to high-scale, impact-driven teams.

EXPERIENCE

One Community Global — Toronto, ON, Canada

March 2024 – July 2024

Full Stack Developer

- Optimized **React state management** to reduce unnecessary re-renders, improving rendering speed by 25% and enhancing user experience.
- Refactored front-end codebase, cutting page load times by 20% and improving application efficiency.
- Redesigned and **enhanced UI components**, increasing user engagement and satisfaction metrics across the platform.
- Conducted code reviews and debugging sessions, reducing production issues by 15% and elevating code quality.

FiatMatch — Toronto, ON, Canada

May 2023 – August 2023

Software Developer

- Designed 10+ key features for a **FinTech platform**, delivering the project one week ahead of schedule.
- Developed reusable UI components using **React, TypeScript, and Material UI**, reducing development time and enabling faster feature rollout.
- Streamlined **API integration processes**, cutting response times and improving overall app performance.
- Coordinated cross-functional team using **Agile tools (ClickUp, Slack)**, enhancing team efficiency and ensuring timely delivery of project milestones.

Infinity Brains — India

March 2021 – October 2021

Laravel Developer

- Built backend systems using **MVC architecture** in Laravel, ensuring scalable infrastructure for two major projects.
- Mentored junior developers, improving team problem-solving capabilities and boosting development efficiency.
- Optimized backend code, enhancing system performance and reducing server response time by 20%.
- Collaborated on **CI/CD pipelines** and version control using **Git**, ensuring smooth deployment processes and high-quality code delivery.

EDUCATION

Humber College, Toronto, ON, Canada

January 2022 – August 2023

Post Graduate Diploma in Information Technology Solutions – GPA: 3.40

Gujarat Technological University, India

August 2015 – May 2019

Bachelor of Engineering in Information Technology – GPA: 3.44

PROJECTS

- [JobPortal](#) — **MERN stack** job portal with **Redux, Tailwind CSS, and Shadcn UI**. Built secure authentication, optimized database performance, and applied modern UI/UX best practices.
- [ChatApp](#) — Real-time MERN stack chat app with **Zustand** and **Socket.io** for instant messaging. Added authentication and responsive design, and live online user status
- [Music Academy](#) — A modern, responsive, and feature-rich web application built using **Next.js** and **Aceternity UI** for Music Academy.

TECHNICAL SKILLS

Frontend Development: React.js • React Router • React Hooks • Next.js • Redux • Context API • JavaScript(ES5/ES6) • CSS3 • HTML5 • Bootstrap • Tailwind CSS • ShadCN UI

Backend Development: Node.js • Express.js • PHP • Laravel • Java • TypeScript

Database Management: MySQL • MongoDB • Amazon AWS

API Development & Integration: RESTful APIs • Third-party API Integrations • Multer • Cloudinary

Version Control & Collaboration: Git • GitHub • Jira • ClickUp • Slack • Postman • VS Code

Security & Authentication: JWT • Passport.js

Development Methodologies: Agile • Scrum • Test-Driven Development (TDD)
