

# Hiral Soni

## Software Engineer

+1(647)866-7197 | [ihiralsoni@gmail.com](mailto:ihiralsoni@gmail.com) | Toronto, ON

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

Full-stack developer with 3 years of experience using **Node.js**, **TypeScript**, **React**, **Angular** and **MongoDB** to build and optimize scalable web applications and RESTful APIs. Passionate about solving complex problems and excited to contribute technical expertise to high-scale, impact-driven teams.

## EXPERIENCE

---

### Xodiac Inc. — Toronto, ON, Canada

September 2025 – Present

#### Frontend Developer

- Contributing to a React-based project, building and optimizing frontend tools to enhance functionality.
- Collaborating with the team to ensure clean, efficient, and scalable frontend solutions.

### One Community Global

March 2024 – July 2024

#### Full Stack Developer

- Improved page load speed by **20%** by optimizing **React state logic**, helping users access data faster and navigate smoothly.
- Refactored code to reduce maintenance and improve long-term stability.
- Enhanced **front-end UI** for better accessibility and usability, driving higher user engagement.
- Collaborated on **code reviews** and **debugging** to keep code clean and ready for future features.

### FiatMatch

May 2023 – August 2023

#### Software Developer

- Designed and shipped **10+ core features** for a FinTech money transfer platform, improving security and usability.
- Built reusable React components, cutting repetitive work and speeding up delivery.
- Streamlined API integrations to cut transaction load times by 25% for smoother cross-device performance.
- Applied **Agile workflows** and **clear team communication** using ClickUp and Slack.

### Infinity Brains

March 2021 – October 2021

#### Laravel Developer

- Developed backend systems for **two major client projects**, enabling scalable and secure data management.
- Mentored junior devs to raise the team's overall code quality and problem-solving confidence, speeding up delivery cycles.
- Optimized server-side code to boost app performance by 20%, improving user response times and server efficiency.
- Contributed to automated deployment pipelines and Git workflows to maintain reliable releases.

## EDUCATION

---

### Humber College, Toronto

January 2022 – August 2023

Post Graduate Diploma – Information Technology Solutions – 8.50/10

### Sarvajanik College of Engineering and Technology, India

August 2015 – May 2019

Bachelor of Engineering – Information Technology – 8.59/10

## PROJECTS

---

- [TaskManagement](#) — A **role-based** task management system built with **Angular**, **NestJS**, and **TypeORM** inside an **NX monorepo**. Supports organizations, roles, and permissions with **JWT** authentication.
- [ChatApp](#) — Real-time MERN stack chat app with **Zustand** and **Socket.io** for instant messaging. Added authentication and responsive design, and live online user status

## TECHNICAL SKILLS

---

### Frontend Development:

- React.js, React Router, React Hooks, Next.js, Redux, Context API, Angular
- JavaScript(ES5/ES6), CSS3, HTML5, Bootstrap, Tailwind CSS, ShadCN UI

### Backend Development:

- Node.js, Express.js, PHP, Laravel, Java, TypeScript, Nest.js, TypeORM

### Database Management:

- MySQL, MongoDB, Amazon AWS, SQLite

### API Development & Integration:

- RESTful APIS, Third-party API Integrations, Multer, Cloudinary

### Version Control & Collaboration:

- Git, GitHub
- Nx Monorepo
- Jira, ClickUp, Slack, Postman, VS Code

### Security & Authentication:

- JWT, Passport.js

### Development Methodologies:

- Agile, Scrum, Test-Driven Development (TDD)
